Excellence in Research

Duke University School of Medicine is the cornerstone of Duke's leadership in academic medicine and is committed to sustaining excellence in a time of rapid change

- One of the largest biomedical research enterprises in the U.S.
- Over \$1 billion in sponsored research in FY2024

Duke Clinical Research Institute is the world's largest academic clinical research organization

- Over 2 million patients have been enrolled in more than 2,500 studies at 3,500 study sites worldwide
- Research collaborations with over 40 countries and over 1,600 sites in the U.S.
- Over 130 faculty representing more than 15 therapeutic areas

Excellence in Research

Duke University School of Nursing

- National Institute of Health (NIH) ranking
 - 15th for funds awarded
 - 3rd overall funding for individual training awards
- Received Year 2 Notice of Award for the T32 Nurse-LEADS program, providing pre- and postdoctoral training to prepare emerging nurse scientists to address community and population health challenges

Duke University School of Nursing Collaborative Research Clusters
to Advance Nurse-Led Models of Care

Duke Cancer Institute

Duke Cancer Institute is a collaborative powerhouse—audacious, evolving, unconventional—at the center of a world-renowned university and medical center.

We unleash the power of synchronous collaboration to create breakthroughs that rapidly transform the unimagined into the possible—to fuel a pace of discoveries and advances previously thought impossible.

Serves approximately 80,000 patients annually from across the United States and around the world

Home to more than 400 researchers and physicians

Clinical and research partnerships in India, Tanzania, China, Singapore and across the United States

Receives more than \$145 million annually in cancer research funding from various sources

Ranked among the top 4% of U.S. centers designated as a National Cancer Institute Comprehensive Cancer Center

Duke Cancer Network

The **Duke Cancer Network** collaborates with organizations to bring excellence in cancer care to their communities.

Our spectrum of service and affiliation models includes:

- Clinical research, regulatory audit, and education support, including policy development, access to Duke investigator-initiated and cooperative group trials, faculty presentations, Duke Tumor Board participation, and CME/CE programming
- Cancer program development and quality enhancement support, including evidence-based guidelines, multidisciplinary care models, subspecialty advisory services, clinical research opportunities, CME/CE programming, and potential co-brand as a Duke Health affiliate

Duke International Patient Services

Concierge-Level Support from Inquiry to Return Home

Every year, people travel from around the world to Durham, North Carolina, to receive the outstanding care for which Duke University Hospital is internationally recognized. Our dedicated international patient services team assists patients and families traveling from outside the United States for care. Our goal is to tailor a culturally appropriate care experience for patients.

Why Duke International Patient Services?

Dedicated International Patient Coordinator

- Single point of contact throughout the patient journey
- Coordination of appointments, records review, and treatment planning
- Continuous communication with patients, families, and referring providers

Rapid Access to Care

- Accelerated review of medical records
- Efficient scheduling of consultations and treatment
- Coordination across multiple specialties when needed

Comprehensive Travel & Logistics Support

- Visa support documentation
- Assistance with travel planning and local accommodations
- Airport transportation coordination and concierge services

Language & Cultural Support

- Professional medical interpreters
- Culturally responsive care teams
- Support for patients and families from diverse backgrounds

Personalized Family Experience

- Family-centered approach throughout the care journey
- Assistance navigating the Duke campus and community resources
- Dedicated support beyond clinical appointments

Continuity of Care

- Collaboration with referring physicians
- Treatment summaries and follow-up recommendations
- Seamless transition back to home-country providers

Why Durham, North Carolina for Medical Care?

Easy Access

- One-stop connections from major Middle East hubs through key U.S. gateways
- Raleigh-Durham International Airport (RDU) located just minutes from Duke Health

Comfortable Environment

- Safe, welcoming, family friendly community
- Mild climate with less congestion and stress than larger metropolitan areas

Convenient for Families

- Premium hotels, furnished apartments, and extended-stay accommodations nearby
- Shopping, dining, faith-based resources, and interpreter services readily available

Value Without Compromise

- Lower lodging and daily living costs compared with many major U.S. medical destinations
- High-quality accommodations and services at a more favorable cost

Focused Healing Experience

- Walkable medical campus with coordinated care team
- Less travel time between appointments, accommodations, and support services

Innovation Hub

- Located within North Carolina's Research Triangle
- Home to leading academic, biotechnology, and healthcare organizations
